Year of Passing	2016
Grade	60-64.9%

Class X

Board	Tamil Nadu
Medium	Telugu
Year of Passing	2014
Grade	50-54.9%

PROJECTS

REAL-TIME COMMUNICATION SYSTEM POWERED BY AI FOR SPECIALLY ABLED, 6 Months

In our society, we have people with disabilities. The technology is developing day by

day but no significant developments are undertaken for the betterment of these people.

Communications between deaf-mute and a normal person has always been a challenging task. It

is very difficult for mute people to convey their message to normal people. Since normal people

are not trained on hand sign language. In emergency times

conveying their message is very

difficult. The human hand has remained a popular choice to convey information in situations where

other forms like speech cannot be used. Voice Conversion System with Hand Gesture Recognition

and translation will be very useful to have a proper conversation between a normal person and an

impaired person in any language.
